

# Assignment X, Math 187

Dr. Holmes

July 19, 2004

This rather long problem set is due Monday, July 26. There will certainly be intervening assignment(s); the idea is to give you plenty of time to work on these. Do NOT leave them until the last minute!

1. Section 10.7, problems 1, 2, 3, 4, 6, 7, 10 (try thinking about it for some definite number of colors first).
2. Section 11.8: problems 1, 2, 4, 13, 14.
3. (extra credit): Section 11.8: 3, 6, 15.
