

## MAT 275 Sections 001 and 002

### Review Problems for Final Exam

These problems are taken from the Review Exercises at the end of each Chapter. Note that they are all even problems. If you get stuck on an even problem, do a nearby odd problem for which you have the solution, and try the even one again. On Friday I will go over or give solutions to the even problems. Please email me ahead of time which problems you find the most difficult.
